

IN THE SPECIFICATION

Please amend the paragraph on page 11, lines 20-25 as follows.

Anti-PAI-1 antibodies displaying the desired binding specificity, as described above, may be obtained using screening methods similar to those described by Declerck et al., (1988), *Blood*, v. 71, p. 220, and anti-multimeric vitronectin antibodies may be screened for desired binding specificity as described by Sockman et al., (1993), *J. Biol. Chem.*, v.268, p.22874 or Seiffert et al., (1994), *J. Biol. Chem.*, v.269, p.2659.
